- Discussing the latest evidence about the health of people living with a mental illness and what we need to do about it.
- Hearing personal stories from consumers, carers and service providers about the challenges of building good physical health and how to overcome these challenges.
- Building hope for a better future by identifying practical things we can all do to improve the physical health of people with a mental illness.
- Enjoying a lively discussion with audience participation from around Australia and from people at home.
